JPMorganChase

PILLAR 3 REGULATORY CAPITAL DISCLOSURES

For the quarterly period ended March 31, 2025

Table of Contents

DISCLOSURE MAP

Pillar 3 Requirement	Description	Pillar 3 Report page reference	1Q25 Form 10-Q page reference	2024 Form 10-K page reference
Capital structure	Components of capital	5	35	174, 175, 289, 291, 293
	Terms and conditions of capital instruments	5		289, 291, 293
Capital adequacy	Risk-weighted assets by risk stripe	6		104
	Capital requirements	6	34	100
	Capital adequacy assessment process	7	37	97, 98
	Regulatory capital metrics	8	158	102, 301
Credit risk: general disclosures	Policies and practices	9	47	117, 207, 235, 243, 302
	Credit risk exposures	10	48, 71	117, 150
	Retail			
	Distribution of exposure	11	49, 125, 126, 161	120, 248, 255, 303
	Allowance for Credit Losses	10	126, 140	249, 250, 268
	Wholesale			
	Distribution of exposure	13	53, 117, 133, 161	126, 235, 258, 303
	Allowance for Credit Losses	10	133, 140	261, 268
Credit risk: IRB	Parameter estimation methods	11, 13		
	RWA	11, 13		
Counterparty credit	Parameter estimation methods	14		
	Policies and practices	9		207, 240, 308
	Counterparty credit risk exposure	14		120, 126, 209, 240
	Credit derivatives purchased and sold	10	60	134, 135, 136, 220
Credit risk mitigation	Policies and practices	10		209, 243, 308
	Exposure covered by guarantees and CDS	13, 14		
Securitization	Objectives, vehicles, accounting policies	15	142	181, 209, 271
	Securitization RWA	16		
	Securitization exposure	17		
	Assets securitized	17		
	Current year securitization activity	18		
Equity risk not subject to the market risk capital rules	Policies and practices	19	70	140, 177, 181, 186, 229, 235
	Carrying value and fair value	19	85 , 117	
	Realized and unrealized gains/(losses)	19		
	Equity investments by risk weight	19		
Market risk	Material portfolio of covered positions	20		
	Value-at-risk	20	67	143
	Regulatory market risk capital models	21		
	Stress testing	24		146
Interest rate risk for traditional banking activities	Interest rate risk for traditional banking activities	25	68	146
Operational risk	Operational risk description	26		153
Supplementary leverage ratio (SLR)	Overview of SLR	8, 27	34, 36	104
	Components of SLR	27		

JPMorgan Chase & Co. ("JPMorganChase" or the "Firm") a financial holding company incorporated under Delaware law in 1968, is a leading financial services firm based in the United States of America ("U.S."), with operations worldwide. JPMorganChase had $4.4 trillion in assets and $351.4 billion in stockholders' equity as of March 31, 2025. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Under the J.P. Morgan and Chase brands, the Firm serves millions of customers, predominantly in the U.S., and many of the world's most prominent corporate, institutional and government clients globally.

JPMorganChase's principal bank subsidiary is JPMorgan Chase Bank, National Association ("JPMorgan Chase Bank, N.A."), a national banking association with U.S. branches in 48 states and Washington, D.C. JPMorganChase's principal non-bank subsidiary is J.P. Morgan Securities LLC ("J.P. Morgan Securities"), a U.S. broker-dealer. The bank and non-bank subsidiaries of JPMorganChase operate nationally as well as through overseas branches and subsidiaries, representative offices and subsidiary foreign banks. The Firm's principal operating subsidiaries outside the U.S. are J.P. Morgan Securities plc and J.P. Morgan SE ("JPMSE"), which are subsidiaries of JPMorgan Chase Bank, N.A. and are based in the United Kingdom ("U.K.") and Germany, respectively.

➢ For additional information, refer to the Supervision and Regulation section on pages 4-8 of JPMorgan Chase's Annual Report on Form 10-K for the year ended December 31, 2024 ("2024 Form 10-K").

The Firm has three reportable business segments – Consumer & Community Banking ("CCB"), Commercial & Investment Bank ("CIB") and Asset & Wealth Management ("AWM") – with the remaining activities in Corporate.

First Republic: On May 1, 2023, JPMorganChase acquired certain assets and assumed certain liabilities of First Republic Bank (the "First Republic acquisition") from the Federal Deposit Insurance Corporation ("FDIC"). References in this Pillar 3 Report to "First Republic-related," "associated with First Republic," or similar expressions refer to the relevant effects of the First Republic acquisition, as well as subsequent related business and activities, as applicable.

➢ Refer to page 319 of the 2024 Form 10-K Note 34 - Business Combinations for additional information on the "First Republic acquisition".

Basel III framework

The Basel framework consists of a three "Pillar" approach:

- Pillar 1 establishes minimum capital requirements, defines eligible capital instruments, and prescribes rules for calculating risk-weighted assets ("RWA").
- Pillar 2 requires banks to have an internal capital adequacy assessment process and requires that banking supervisors evaluate each bank's overall risk profile as well as its risk management and internal control processes.
- Pillar 3 encourages market discipline through disclosure requirements, which allow market participants to assess the risk and capital profiles of banks.

Pillar 3 report overview

This report provides information on the Firm's capital structure, capital adequacy, risk exposures, and RWA under the Basel III advanced approach, except where explicitly noted. This report describes the internal models used to translate risk exposures into required capital.

This report should be read in conjunction with JPMorganChase's Pillar 3 Regulatory Capital Disclosures Report for the quarterly period ended December 31, 2024 ("4Q24 Pillar 3 Report"), as well as the Annual Report on Form 10-K for the year ended December 31, 2024 ("2024 Form 10-K") and the Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2025 ("1Q25 Form 10-Q") which has been filed with the U.S. Securities and Exchange Commission ("SEC")

Risk is an inherent part of JPMorganChase's business activities. When the Firm extends a consumer or wholesale loan, advises customers and clients on their investment decisions, makes markets in securities, or offers other products or services, the Firm takes on some degree of risk. The Firm's overall objective is to manage its business, and the associated risks, in a manner that balances serving the interests of its clients, customers and investors, and protecting the safety and soundness of the Firm.

➢ Refer to pages 91-95 of the 2024 Form 10-K and page 32 of the 1Q25 Form 10-Q for further discussion on Firmwide Risk Management.

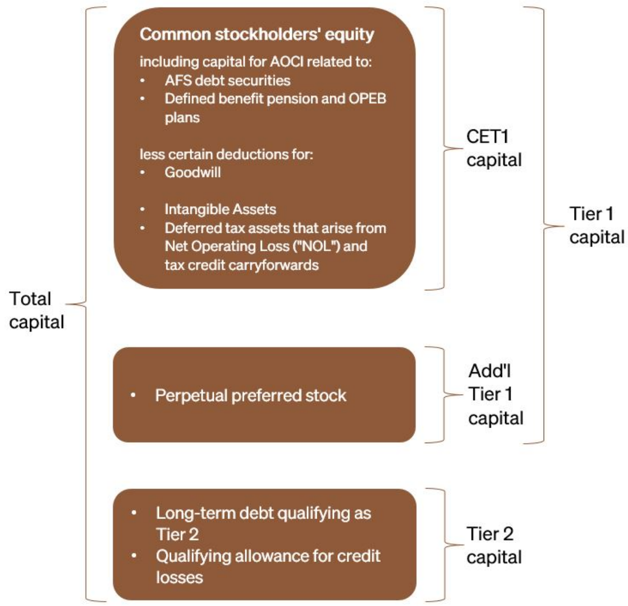
Estimations and Model Risk Management

As stated on page 2 under 'Pillar 3 report overview', internal models are used to translate risk exposures into required capital. A dedicated independent function, Model Risk Governance and Review ("MRGR"), reviews and approves new models, as well as material changes to existing models.

➢ Refer to page 160 of the 2024 Form 10-K for information on Estimations and Model Risk Management.

REGULATORY CAPITAL

The three components of regulatory capital under the Basel III advanced rules and their primary drivers are illustrated below:



Capital management

For information on the Firm's capital management function, objectives, and governance, refer to Capital Management section on pages 33-39, Note 21 on pages 158–159 of the 1Q25 Form 10-Q, pages 97-106 and pages 299-300 of the 2024 Form 10-K.

Basel III Overview

The capital rules under Basel III establish minimum capital ratios and overall capital adequacy standards for large and internationally active U.S. Bank Holding Companies ("BHCs") and banks, including the Firm and JPMorgan Chase Bank, N.A. The minimum amount of regulatory capital that must be held by BHCs and banks is determined by calculating risk-weighted assets ("RWA"), which are on-balance sheet assets and off-balance sheet exposures, weighted according to risk. Under the rules currently in effect, two comprehensive approaches are prescribed for calculating RWA: a standardized approach ("Basel III Standardized"), and an advanced approach ("Basel III Advanced").

For each of these risk-based capital ratios, the capital adequacy of the Firm is evaluated against the lower of the Standardized or Advanced approaches compared to their respective regulatory capital ratio requirements.

➢ Refer to page 98 of the 2024 Form 10-K for information on Basel III rules related to RWA calculation.

As of March 31, 2025, the Firm's Basel III Standardized risk-based ratios continue to be more binding than the Basel III Advanced risk-based ratios.

Additionally, Basel III requires that Advanced Approaches banking organizations, including the Firm, calculate their Supplementary Leverage Ratios ("SLRs").

➢ Refer to page 99 of 2024 Form 10-K for information on Basel III proposal.

➢ Refer to page 99 of the 2024 Form 10-K for information on other Key Regulatory Developments.

Components of capital

A reconciliation of total stockholders' equity to Basel III Advanced CET1 capital, Tier 1 capital, Tier 2 capital and Total capital is presented in the table below. As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out.

- Refer to the Consolidated balance sheets on page 80 of the 1Q25 Form 10-Q for the components of total stockholders' equity.

March 31, 2025 (in millions)		Basel III Advanced
Total stockholders' equity	**$**	**351,420**
Less: Preferred stock		20,045
Common stockholders' equity		**331,375**
Less:		
Goodwill[a]		53,915
Other intangible assets		2,777
Add:		
Deferred tax liabilities[b]		2,928
Other CET1 capital adjustments[c]		2,180
CET1 capital		**279,791**
Preferred stock		20,045
Other Tier 1 capital adjustments		—
Less: Tier 1 capital deductions		704
Total Tier 1 capital		**299,132**
Long-term debt and other instruments qualifying as Tier 2 capital		10,473
Qualifying allowance for credit losses[d][e]		7,533
Other Tier 2 capital adjustments		—
Less:		
Tier 2 capital deductions		609
Total Tier 2 capital		**17,397**
Total capital	**$**	**316,529**

(a) Goodwill deducted from capital includes goodwill associated with equity method investments in nonconsolidated financial institutions based on regulatory requirements.
(b) Represents deferred tax liabilities related to tax-deductible goodwill and to identifiable intangibles created in nontaxable transactions, which are netted against goodwill and other intangibles when calculating CET1 capital.
(c) Includes adjustments for cash flow hedges and debit valuation adjustments ("DVA") related to structured notes recorded in accumulated other comprehensive income ("AOCI").
(d) Represents qualifying eligible credit reserves that exceed expected credit losses, up to a maximum of 0.6% of credit RWA, with any excess deducted from RWA.
(e) Includes incremental $527 million of allowance for credit losses on certain assets associated with First Republic to which the Standardized approach has been applied, as permitted by the transition provisions in the U.S. capital rules. In addition, $1,069 million of credit reserves relating to these assets was deducted from other exposures RWA.

Terms of capital instruments

The terms and conditions of the Firm's capital instruments are described in the Firm's SEC filings.

- Refer to Note 20 on page 289, Note 21 on page 291 and Note 22 on page 293 of the 2024 Form 10-K and Note 17 on page 154 of the 1Q25 Form 10-Q for additional information on subordinated debt, preferred stock and common stock.
- Refer to the Supervision and Regulation section in Part 1, Item 1 on pages 2-7 of the 2024 Form 10-K.

Restrictions on capital and transfer of funds

Regulations govern the amount of distributions the Firm and its banking subsidiaries could pay without the prior approval of their relevant banking regulators. Certain of the Firm's cash and other assets are restricted as to withdrawal or usage. These restrictions are imposed by various regulatory authorities based on the particular activities of the Firm's subsidiaries.

- Refer to Note 20 on page 157 of the 1Q25 Form 10-Q and refer to Note 26 on page 299 of the 2024 Form 10-K for information on restrictions on cash and intercompany funds transfers.

Risk-weighted assets

Basel III establishes two comprehensive approaches for calculating RWA (a Standardized approach and an Advanced approach) which include capital requirements for credit risk, market risk, and in the case of Basel III Advanced, also operational risk. Key differences in the calculation of credit risk RWA between the Standardized and Advanced approaches are that for Basel III Advanced, credit risk RWA is based on risk-sensitive approaches which largely rely on the use of internal credit models and parameters, whereas for Basel III Standardized, credit risk RWA is generally based on supervisory risk-weightings which vary primarily by counterparty type and asset class. Market risk RWA is calculated on a generally consistent basis between Basel III Standardized and Basel III Advanced.

Covered position definition

The covered position definition determines which positions are subject to market risk RWA treatment and, consequently, which positions are subject to credit risk RWA treatment.

- For information on the definition of a covered position, refer to Regulatory capital on page 6 of the 4Q24 Pillar 3 Report.

Covered positions exclude certain positions such as equity positions that are not publicly traded, intangible assets including any servicing assets, and liquidity facilities that provide support to asset-backed commercial paper programs. These excluded positions are referred to as non-covered throughout the report. Both covered and non-covered derivative transactions are subject to counterparty credit risk RWA.

Components of risk-weighted assets

The following table presents the components of the Firm's total risk-weighted assets under Basel III Advanced at March 31, 2025.

March 31, 2025 (in millions)		Basel III Advanced RWA
Credit risk [(a)]	$	1,256,984
Market risk		99,964
Operational risk		442,107
Total RWA	$	1,799,055

(a) Includes $42.1 billion of RWA calculated under the Standardized approach for certain assets associated with First Republic as permitted by the transition provisions in the U.S. capital rules.

RWA rollforward

The following table presents changes in the components of RWA under Basel III Advanced for the three months ended March 31, 2025. The amounts represented in the rollforward categories are an approximation, based on the predominant driver of the change.

	Basel III Advanced RWA			
Three months ended March 31, 2025 (in millions)	Credit risk[(c)(d)]	Market risk	Operational risk	Total
December 31, 2024	$1,218,005	$ 85,132	$ 437,292	$1,740,429
Model & data changes[(a)]	(17)	—	—	(17)
Movement in portfolio levels[(b)]	38,996	14,832	4,815	58,643
Changes in RWA	38,979	14,832	4,815	58,626
March 31, 2025	$1,256,984	$99,964	$ 442,107	$1,799,055

(a) Model & data changes refer to material movements in levels of RWA as a result of revised methodologies and/or treatment per regulatory guidance (exclusive of rule changes).
(b) Movement in portfolio levels (inclusive of rule changes) refers to: for Credit risk RWA changes in book size, changes in composition and credit quality, market movements, and deductions for excess eligible allowances for credit losses not eligible for inclusion in Tier 2 capital; for Market risk RWA, changes in position and market movements and for Operational risk RWA, updates to cumulative losses and macroeconomic model inputs.
(c) As of March 31, 2025, the Basel III Advanced Credit risk RWA included wholesale and retail off balance-sheet RWA of $200.7 billion.
(d) As of March 31, 2025, Credit risk RWA reflects approximately $42.1 billion of RWA calculated under the Standardized approach for certain assets associated with First Republic as permitted by the transition provisions in the U.S. capital rules.

Capital requirements

A strong capital position is essential to the Firm's business strategy and competitive position. Maintaining a strong balance sheet to manage through economic volatility is a strategic imperative of the Firm's Board of Directors, CEO and Operating Committee. The Firm's "fortress balance sheet" philosophy focuses on risk-adjusted returns, strong capital and robust liquidity. The Firm's capital risk management strategy focuses on maintaining long-term stability to enable the Firm to build and invest in market-leading businesses, including in highly stressed environments.

➢ Refer to the Capital Risk Management section on pages 33-39 of the 1Q25 Form 10-Q pages 97-107 of the 2024 Form 10-K for information on Capital risk management, capital management and governance.

The Basel III framework applies to the consolidated results of JPMorgan Chase & Co. The basis of consolidation used for regulatory reporting is the same as that used under U.S. GAAP. There are no material entities within JPMorganChase that are deconsolidated for regulatory capital purposes and whose capital is deducted.

Under the risk-based capital and leverage-based guidelines of the Federal Reserve, JPMorgan Chase & Co. is required to maintain minimum ratios, plus regulatory buffers for CET1 capital, Tier 1 capital, Total capital, Tier 1 leverage and the SLR.

The following table presents the risk-based regulatory capital ratio requirements and well-capitalized ratios to which the Firm and JPMorgan Chase Bank, N.A. were subject as of March 31, 2025.

	Capital ratio requirements		Well-capitalized ratios	
	BHC[(a)]	IDI[(b)]	BHC[(c)]	IDI[(d)]
Capital ratios				
CET1 capital	11.5 %	7.0 %	NA [(e)]	6.5 %
Tier 1 capital	13.0	8.5	6.0 %	8.0
Total capital	15.0	10.5	10.0	10.0
Tier 1 leverage	4.0	4.0	NA [(e)]	5.0
SLR[(f)]	5.0	6.0	NA [(e)]	6.0

Note: The table above is as defined by the regulations issued by the Federal Reserve, OCC and FDIC and to which the Firm and JPMorgan Chase Bank, N.A. are subject.

(a) Represents the regulatory capital ratio requirements applicable to the Firm. The CET1, Tier 1 and Total capital ratio requirements each include a respective minimum requirement plus a GSIB surcharge of 4.5% as calculated under Method 2; a fixed 2.5% capital conservation buffer for Basel III Advanced ratios. The countercyclical buffer is currently set to 0% by the federal banking agencies.
(b) Represents requirements for JPMorgan Chase Bank, N.A. The CET1, Tier 1 and Total capital ratio requirements include a fixed capital conservation buffer requirement of 2.5% that is applicable to JPMorgan Chase Bank, N.A. JPMorgan Chase Bank, N.A. is not subject to the GSIB surcharge.
(c) Represents requirements for bank holding companies pursuant to regulations issued by the Federal Reserve.
(d) Represents requirements for JPMorgan Chase Bank, N.A. pursuant to regulations issued under the FDIC Improvement Act.
(e) The Federal Reserve's regulations do not establish well-capitalized thresholds for these measures for BHCs.

(f) Represents minimum SLR requirement of 3.0%, as well as supplementary leverage buffer requirements of 2.0% and 3.0% for BHC and JPMorgan Chase Bank, N.A., respectively.

In addition, the Federal Reserve's Total Loss Absorbing Capacity ("TLAC") rule requires the U.S. global systemically important bank ("GSIB") top-tier holding companies, including the Firm, to maintain minimum levels of external TLAC and eligible long-term debt ("eligible LTD").

➢ Refer to Other capital requirements on page 38 of the 1Q25 Form 10-Q for additional information on TLAC and external long-term debt minimum requirements including applicable regulatory buffers.

Failure to meet these regulatory requirements would result in restriction on capital distributions and certain discretionary bonus payments based on a percentage of the Firm's eligible retained income. Eligible retained income ("ERI") is defined as the greater of (a) net income for the four preceding quarters, net of any distributions and associated tax effects not already reflected in net income, and (b) the average of net income over the preceding four quarters, net of any associated tax effects not already reflected in net income. The ERI in effect during the First quarter of 2025 for the Firm and JPMorgan Chase Bank, N.A. was $19.1 billion and $15.5 billion, respectively. JPMorgan Chase Bank, N.A. is also subject to these capital requirements with the exception of TLAC, established by its primary regulators.

Capital adequacy and Capital conservation buffer

As of March 31, 2025, the Firm and its principal insured depository institution ("IDI") subsidiary, JPMorgan Chase Bank N.A. were well-capitalized and met all capital requirements to which each was subject. In addition to its principal IDI subsidiary, J.P. Morgan Chase & Co. also has other regulated subsidiaries, all of which met applicable capital requirements.

As of March 31, 2025, the capital conservation buffer of the Firm under the standardized and advanced approaches was 10.2% and 9.6%, respectively, which exceeded the required standardized capital conservation buffer of 7.8% and required advanced capital conservation buffer of 7.0%. As of March 31, 2025, the capital conservation buffer of JPMorgan Chase Bank, N.A. under the standardized and advanced approaches was 8.9% and 9.3%, respectively, which exceeded the required capital conservation buffer of 2.5%.

The capital conservation buffer for the Firm and principal IDI subsidiary is calculated as the lowest of the:

(i) CET1 ratio less the CET1 minimum requirement of 4.5%;

(ii) Tier 1 ratio less the Tier 1 minimum requirement of 6.0%; and

(iii) Total capital ratio less the Total capital minimum requirement of 8.0%.

The capital adequacy of the Firm and JPMorgan Chase Bank N.A. are evaluated against the Basel III approaches (Standardized or Advanced), which for each quarter, results in the lower ratio as well as the supplementary leverage ratio.

➢ For information on the Firm's Internal Capital Adequacy Assessment Process ("ICAAP") and Comprehensive Capital Analysis and Review ("CCAR") processes, refer to page 38-39 of the 1Q25 Form 10-Q.

Regulatory capital metrics for JPMorgan Chase & Co. and JPMorgan Chase Bank, N.A.

The following tables present the risk-based and leverage-based capital metrics for JPMorgan Chase & Co. and JPMorgan Chase Bank, N.A. as of March 31, 2025.

As of March 31, 2025 (in millions, except ratios)	JPMorgan Chase & Co. Basel III Advanced
Risk-based capital metrics:	
CET1 capital	$ 279,791
Tier 1 capital	299,132
Total capital[a]	316,529
Risk-weighted assets	1,799,055
CET1 capital ratio	15.6 %
Tier 1 capital ratio	16.6
Total capital ratio	17.6
Leverage-based capital metrics:	
Adjusted average assets[b]	$ 4,180,147
Tier 1 leverage ratio	7.2 %
Total leverage exposure	$ 4,953,480
SLR	6.0 %

As of March 31, 2025 (in millions, except ratios)	JPMorgan Chase Bank, N.A. Basel III Advanced
Risk-based capital metrics:	
CET1 capital	$ 277,695
Tier 1 capital	277,699
Total capital	284,478
Risk-weighted assets	1,641,027
CET1 capital ratio	16.9 %
Tier 1 capital ratio	16.9
Total capital ratio	17.3
Leverage-based capital metrics:	
Adjusted average assets[b]	$ 3,512,974
Tier 1 leverage ratio	7.9 %
Total leverage exposure	$ 4,269,679
SLR	6.5 %

(a) Total regulatory capital for JPMorgan Chase & Co. includes $167 million of surplus regulatory capital in insurance subsidiaries.
(b) Adjusted average assets, for purposes of calculating the leverage ratios, includes quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill, inclusive of estimated equity method goodwill, and other intangible assets.

➢ Refer to Capital Risk Management section on pages 33-39 and Note 21 on pages 158-159 of the 1Q25 Form 10-Q for Basel III Standardized capital metrics including Credit Risk and Market Risk RWA.

Supplementary leverage ratio ("SLR")

The following table presents the components of the Firm's SLR as of March 31, 2025.

March 31, 2025 (in millions, except ratios)	Basel III Advanced
Basel III Advanced Tier 1 capital	**$ 299,132**
Total spot assets	**4,357,856**
Add: Adjustments for frequency of calculations[a]	(122,542)
Total average assets	**4,235,314**
Less adjustments for:	
Adjustments for deductions from tier 1 capital[b]	55,167
Add adjustments for:	
Adjustment for derivative transactions	301,735
Adjustment for repo-style transactions	53,612
Off-balance sheet exposures[c]	417,986
Other[d]	—
Total leverage exposure	**$ 4,953,480**
Basel III Advanced SLR	**6.0 %**

(a) The adjustment for frequency of calculations represents the difference between total spot assets at March 31, 2025 and total average assets for the three months ended March 31, 2025.
(b) For purposes of calculating the SLR, includes quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill, inclusive of estimated equity method goodwill, other intangible assets.
(c) Off-balance sheet exposures are calculated as the average of the three month-end spot balances on applicable regulatory exposures during the reporting quarter.

Total Loss-Absorbing Capacity ("TLAC")

The following table presents the eligible external TLAC and eligible LTD amounts, as well as a representation of these amounts as a percentage of the Firm's total RWA and total leverage exposure as on March 31, 2025. As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out.

	March 31, 2025	
(in billions, except ratio)	External TLAC	LTD
Total eligible amount	$ 558.3	$ 243.7
% of RWA	30.8 %	13.4 %
Regulatory requirements	23.0	10.5
Surplus/(shortfall)	$ 140.8	$ 53.1
% of total leverage exposure	11.3 %	4.9 %
Regulatory requirements	9.5	4.5
Surplus/(shortfall)	$ 87.7	$ 20.8

➢ For additional information on TLAC, refer to the Capital Risk Management section on pages 33-39 of the 1Q25 Form 10-Q. For information on the financial consequences to holders of the Firm's debt and equity securities in a resolution scenario, refer to Part I, Item 1A: Risk Factors on pages 10-37 of the Firm's the 2024 Form 10-K.

Credit risk is the risk associated with the default or change in credit profile of a client, counterparty or customer. The Firm provides credit to a variety of clients and customers, ranging from large corporate and institutional clients to individual consumers and small businesses. The consumer credit portfolio consists of scored mortgage and home equity loans held in CCB and AWM; scored mortgage loans held in Corporate; scored credit card, auto and business banking loans, and overdrafts in CCB; and the associated lending-related commitments. The wholesale credit portfolio refers primarily to exposures held by CIB, AWM and Corporate, as well as risk-rated business banking and auto dealer loans held in CCB. In addition to providing credit to clients, the Firm engages in client-related activities that give rise to counterparty credit risk such as securities financing, margin lending and market-making activities in derivatives. Finally, credit risk is also inherent in the Firm's investment securities portfolio held by Treasury and Chief Investment Office ("CIO") in connection with its asset-liability management objectives. Investment securities, as well as deposits with banks and cash due from banks, are classified as wholesale exposures for RWA reporting.

- For information on counterparty default risk and credit valuation adjustment ("CVA"), refer to page 10 of the 4Q24 Pillar 3 Report.
- For information on internal model method ("IMM") exposure at default ("EAD") Methodology, refer to the Counterparty Credit Risk section on pages 18-19 of the 4Q24 Pillar 3 Report.

For information on risk management policies and practices, governance and oversight and accounting policies related to these exposures:

- Refer to Credit and Investment Risk Management on pages 117-139 of the 2024 Form 10-K and pages 47-64 of the 1Q25 Form 10-Q.
- Refer to the Notes to the Consolidated Financial Statements beginning on page 177 of the 2024 Form 10-K and page 83 of the 1Q25 Form 10-Q. Specific page references are contained in the Appendix of this report.

Summary of credit risk RWA

Credit risk RWA includes retail, wholesale and counterparty credit exposures described in this section as well as non-covered securitization and equity exposures. Other exposures such as non-material portfolios, unsettled transactions and other assets that are not classified elsewhere are also included. The following table presents the Firm's total credit risk RWA including a 1.06 scaling factor excluding CVA at March 31, 2025.

March 31, 2025 (in millions)		Basel III Advanced RWA
Retail exposures	$	221,630
Wholesale exposures		544,914
Counterparty exposures		139,690
Securitization exposures[(a)]		59,759
Equity exposures		63,519
Other exposures[(b)(c)]		179,240
CVA		51,575
Less: Excess eligible credit reserves not included in Tier 2 capital		3,343
Total credit risk RWA	$	1,256,984

(a) Represents securitization RWA for non-covered positions only.
(b) Includes retail and wholesale exposures of $21.9 billion and $20.1 billion respectively calculated under the Standardized Approach for certain assets associated with the First Republic as permitted by the transition provisions under the U.S. capital rules. Also includes other assets, non-material portfolios, and unsettled transactions.
(c) Includes a deduction for $1,069 million of allowance for loan losses calculated under the Standardized approach for certain assets associated with the First Republic, as permitted by the transition provisions within the U.S. capital rules.

Credit risk exposures

Credit risk exposures for the three months ended March 31, 2025 are contained in the 1Q25 Form 10-Q. Specific references to the 1Q25 Form 10-Q are listed below.

Traditional credit products

- Refer to Credit and Investment Risk Management beginning on page 47 for credit-related information on the consumer and wholesale portfolios.
- Refer to Note 11 on pages 123-138 for the distribution of loans by geographic region and industry.
- Refer to Note 22 on pages 160-163 for the contractual amount and geographic distribution of lending-related commitments.
- Refer to Consumer Credit Portfolio and Wholesale Credit Portfolio on pages 49 and 53 for information on remaining contractual maturity breakdown for consumer and wholesale portfolios.

Counterparty credit risk

- Refer to the Consumer Credit Portfolio section on pages 49-51, and to the Wholesale Credit Portfolio section on pages 52-60 for eligible margin loans balances.
- Refer to Wholesale Credit Portfolio footnote (d) on page 53 and Country Risk on page 71.
- Refer to Note 4 on pages 99-111 for the gross positive fair value, netting benefits and net exposure of derivative receivables.
- Refer to Derivative contracts on page 59 for credit derivatives used in credit portfolio management activities.
- Refer to Credit and Investment Risk Management on page 117, Note 4, Credit risk concentration, on pages 207-208, Note 5, Derivative instruments, on pages 209-224 and Note 11, Securities financing activities, on pages 240-242 of 2024 Form 10-K for a discussion of credit limits for counterparty credit exposures, policies for securing collateral, valuing and managing collateral.
- Refer to Note 4, Derivative instruments, on pages 99-111, Note 10, Securities financing activities, on pages 121-122 and Wholesale Credit Portfolio, Receivables from customers, on page 59 of the 1Q25 Form 10-Q for a discussion of primary types of collateral taken for counterparty credit exposures.
- Refer to Note 10 on pages 121-122 for information on gross and net securities purchased under resale agreements and securities borrowed transactions, and for information regarding the credit risk inherent in the securities financing portfolio.

Investment securities

- Refer to Credit and Investment Risk Management on pages 47-64 and Note 9 on pages 117-120 for the investment securities portfolio by issuer type.

Country risk

- Refer to page 71 the top 20 country exposures (excluding the U.S.).

Allowance for credit losses

- Refer to Allowance for Credit Losses on pages 61-63 for a summary of changes in the allowance for loan losses and allowance for lending-related commitments.
- Refer to Note 12 on pages 139-141 for the allowance for credit losses and loans and lending-related commitments by impairment methodology.
- Refer to Note 9 on pages 117-120 for the allowance for credit losses on held-to-maturity securities.

Average balances

- Refer to page 167 for the Consolidated average balance sheet.

Credit Risk Mitigation

- Refer to Credit and Investment Risk Management, Risk monitoring and management on page 118, Note 1, Basis of presentation, Offsetting assets and liabilities, on pages 177-180, Note 4, Credit risk concentrations, on page 207-208, Note 5, Derivative instruments, on pages 209-224, and Note 11, Securities financing activities on pages 240-242 of the 2024 Form 10-K for a discussion of processes for managing and recognizing credit risk mitigation and policies on netting benefit.
- Refer to Market Risk Management, Risk monitoring and control, on page 141, Note 4, Credit risk concentrations, on page 207-208, Note 5, Derivative instruments, on pages 209-224, and Note 11, Securities financing activities, on pages 240-242 of the 2024 Form 10-K for a discussion of market and credit risk concentrations and credit derivative counterparties and their creditworthiness.

Credit risk concentrations

- Refer to Note 4, Credit risk concentrations on pages 207-208 of the 2024 Form 10-K for additional information.

The retail portfolio is comprised of exposures that are scored and managed on a segment basis rather than on an individual-exposure basis. For the retail portfolio, credit loss estimates are based on statistical analysis of credit losses over discrete periods of time. The statistical analysis uses portfolio modeling, credit scoring, and decision-support tools, which consider loan-level factors such as delinquency status, credit scores, collateral values, and other risk factors.

The population of exposures subject to retail capital treatment for regulatory reporting substantially overlaps with the consumer credit portfolio reflected in the Firm's Form 10-K. The retail population consists of all scored exposures (mainly in CCB), certain residential mortgages booked as trading assets (that do not meet the definition of a covered position) and certain wholesale loans under $1 million as required by the Basel III capital rules.

Risk-weighted assets

The following table presents the Firm's retail RWA at March 31, 2025.

March 31, 2025 (in millions)		Basel III Advanced RWA
Residential mortgages	$	38,152
Qualifying revolving		155,703
Other retail		27,775
Total retail credit RWA	$	221,630

➢ For information on risk-weighted assets and risk parameter estimation methods for retail credit portfolio, refer to Retail Credit Risk on pages 13-15 of the 4Q24 Pillar 3 Report.

Residential mortgage exposures

The following table includes first lien and junior lien mortgages and revolving home equity lines of credit. First lien mortgages were 93.8% of the exposure amount, revolving exposures were 6.1%, and the remaining exposures related to junior lien mortgages. Revolving exposures were predominantly originated prior to 2010 and drive approximately 15% of the total risk weighted assets of this portfolio, with nearly 17% of the exposures in the equal to or greater than 0.75% probability of default ("PD") ranges. Recent originations are primarily first lien mortgages and are predominantly reflected in the less than 0.75% PD ranges.

March 31, 2025 (in millions, except ratios)									Exposure-weighted average		
PD range (%)		Balance sheet amount		Off balance sheet commitments		EAD		RWA	PD	LGD	Risk weight
0.00 to < 0.10	$	140,326	$	19,694	$	149,725	$	7,234	0.05	31.89	4.83
0.10 to < 0.20		33,584		1,964		35,120		3,821	0.15	32.69	10.88
0.20 to < 0.75		44,409		1,191		45,424		9,946	0.36	33.37	21.90
0.75 to < 5.50		12,111		294		12,317		8,312	1.70	37.10	67.49
5.50 to < 10.00		570		—		566		825	7.03	35.54	145.70
10.00 to < 100		1,609		3		1,602		2,925	31.75	33.45	182.69
100 (default)		2,742		7		2,757		5,089	100.00	N/A (a)	184.59
Total	$	235,351	$	23,153	$	247,511	$	38,152	1.54%	32.20%	15.42%

(a) The Loss given default ("LGD") rate is reported as N/A for residential mortgage exposures in default because at the point they are classified as defaulted per the Basel III capital rules definition they have been charged off to the fair value of any underlying collateral less cost to sell. Any balance remaining after the charge-off is risk weighted at 100%.

Qualifying revolving exposures

The following table includes exposures to individuals that are revolving, unsecured and unconditionally cancellable by JPMorganChase; and they have a maximum exposure amount of up to $100,000 (i.e., credit card and overdraft lines on individual checking accounts).

March 31, 2025 (in millions, except ratios)					Exposure-weighted average		
PD range (%)	Balance sheet amount	Off balance sheet commitments	EAD	RWA	PD	LGD	Risk weight
0.00 to < 0.50	$ 89,607	$ 915,027	$ 358,557	$ 18,849	0.09	91.53	5.26
0.50 to < 2.00	48,151	73,810	62,869	24,563	1.05	94.09	39.07
2.00 to < 3.50	22,518	12,540	24,440	19,048	2.63	94.27	77.93
3.50 to < 5.00	17,681	3,232	17,961	17,908	3.73	94.13	99.70
5.00 to < 8.00	12,816	2,500	12,947	19,340	6.93	94.48	149.38
8.00 to < 100	29,522	1,664	29,525	55,995	23.62	93.23	189.65
100 (default)	—	—	—	—	0.00	N/A [(a)]	—
Total	$ 220,295	$ 1,008,773	$ 506,299	$ 155,703	2.01%	92.25%	30.75%

(a) Defaulted exposures in the qualifying revolving portfolio are charged off prior to reaching default as defined in the Basel III capital rules. Accordingly, no defaulted exposures are reported in the 100 (default) PD range.

Other retail exposures

The following table includes other retail exposures to individuals that are not classified as residential mortgage or qualifying revolving exposures (e.g. includes scored auto loans, credit card accounts above $100,000, business card exposures without a personal guarantee, scored business banking loans and certain wholesale loans under $1 million).

March 31, 2025 (in millions, except ratios)					Exposure-weighted average		
PD range (%)	Balance sheet amount	Off balance sheet commitments	EAD	RWA	PD	LGD	Risk weight
0.00 to < 0.50	$ 36,538	$ 14,590	$ 42,004	$ 6,817	0.20	40.66	16.23
0.50 to < 2.00	29,411	4,675	30,345	12,232	1.11	36.94	40.31
2.00 to < 3.50	3,831	1,145	4,075	3,149	2.49	54.15	77.28
3.50 to < 5.00	1,996	597	2,077	1,389	3.85	43.87	66.86
5.00 to < 8.00	1,187	112	1,200	798	6.49	41.27	66.57
8.00 to < 100	2,690	8	2,704	2,798	24.91	50.73	103.53
100 (default)	558	—	558	592	100.00	N/A [(a)]	106.00
Total	$ 76,211	$ 21,127	$ 82,963	$ 27,775	2.31%	40.11%	33.48%

(a) The LGD rate is reported as N/A for retail exposures in default because at the point they are classified as defaulted per the Basel III capital rules definition they have been charged off to the fair value of any underlying collateral less cost to sell. Any balance remaining after the charge off is risk weighted at 100%.

The wholesale portfolio is a risk-rated portfolio. Risk-rated portfolios are generally held in CIB, AWM and in Corporate but also include certain business banking and auto dealer loans held in CCB that are risk-rated because they have characteristics similar to commercial loans.

The population of risk-rated loans and lending-related commitments receiving wholesale treatment for regulatory capital purposes predominantly overlaps with the wholesale credit portfolio reflected in the Firm's SEC disclosures. In accordance with the Basel III capital rules, the wholesale population for regulatory capital consists of:

- All risk-rated loans and commitments (excluding certain wholesale loans under $1 million that receive retail regulatory capital treatment);
- Deposits with banks, and cash and due from banks;
- Exposures to issuer risk for non-covered debt securities;
- Certain exposures recorded as trading assets that do not meet the definition of a covered position;

Certain off-balance sheet items, such as standby letters of credit and letters of credit, are reported net of risk participations for U.S. GAAP reporting, but are included gross of risk participations for regulatory reporting.

Risk-weighted assets

The following table presents risk-weighted assets by Basel reporting classification. The Corporate, Bank and Sovereign classifications include credit or issuer exposure to these entities. High volatility commercial real estate ("HVCRE") refers to acquisition, development and construction lending. HVCRE is a separate Basel classification because these loans represent higher risk than loans financing income-producing real estate ("IPRE").

March 31, 2025 (in millions)		Basel III Advanced RWA
Corporate	$	431,584
Bank		13,281
Sovereign		37,706
Income-producing real estate		61,902
High volatility commercial real estate		441
Total wholesale credit RWA	$	544,914

➢ For information on risk parameter estimation methods for the wholesale credit portfolio, refer to Wholesale Credit Risk on pages 16-17 of the 4Q24 Pillar 3 Report.

Wholesale exposures

The following table presents exposures to wholesale clients and issuers by PD range. Exposures are comprised primarily of traditional credit products (i.e., loans and lending-related commitments), issuer risk for debt securities, and cash placed with various central banks, predominantly Federal Reserve Banks. Total EAD is $1.9 trillion, with 78% of this exposure in the first two PD ranges, which are predominantly investment-grade. Exposures meeting the Basel definition of default represent 0.5% of total EAD. The exposure-weighted average LGD for the wholesale portfolio is 22%.

March 31, 2025 (in millions, except ratios)											
								Exposure-weighted average			
PD range (%)		Balance sheet amount		Off balance sheet commitments		EAD		RWA	PD	LGD	Risk weight
0.00 to <0.15	$	1,077,721	$	116,052	$	1,163,624	$	88,070	0.05	15.31	7.57
0.15 to <0.50		175,265		197,467		309,153		127,748	0.18	32.03	41.32
0.50 to <1.35		170,819		133,211		245,989		149,983	0.81	33.52	60.97
1.35 to <10.00		87,316		70,702		127,496		118,636	3.61	30.46	93.05
10.00 to <100		23,984		23,835		35,072		49,822	21.09	29.68	142.06
100 (default)		9,414		1,189		10,058		10,655	100.00	N/A [(a)]	105.97
Total	$	1,544,519	$	542,456	$	1,891,392	$	544,914	1.33%	21.95%	28.81%

(a) The LGD rate is reported as N/A for defaulted wholesale exposures because the RWA is calculated based on supervisor provided risk weights and does not depend on LGD estimates.

Credit risk mitigation

The risk mitigating benefit of eligible guarantees and credit derivative hedges are reflected in the RWA calculation as permitted by the Basel III capital rules. At March 31, 2025, $113.0 billion of EAD for wholesale exposures is covered by eligible guarantees or credit derivatives.

Counterparty credit risk exposures arise from OTC derivatives, repo-style transactions, eligible margin loans and cleared transactions.

Risk-weighted assets

The following table presents risk-weighted assets by transaction type.

March 31, 2025 (in millions)		Basel III Advanced RWA
OTC derivatives	$	54,584
Repo-style transactions		48,310
Eligible margin loans		25,087
Cleared transactions		11,709
Total counterparty credit RWA	$	139,690

➢ For information on risk-weighted assets, risk parameter estimation methods and wrong-way risk for the counterparty credit portfolio, refer to Counterparty Credit Risk on pages 18-19 of the 4Q24 Pillar 3 Report.

Counterparty Credit Exposures

The following table presents counterparty credit risk exposures for OTC derivatives, repo-style transactions and eligible margin loans by PD range. The table does not include cleared transactions. Total EAD is $336 billion, with 77% of this exposure in the first two PD ranges, which are predominantly investment-grade. Exposures meeting the Basel definition of default represent 0.1% of total EAD. The exposure-weighted average LGD for this portfolio is 39%. The collateral benefit is reflected primarily in the EAD.

March 31, 2025 (in millions, except ratios)					Exposure-weighted average		
PD range (%)		EAD		RWA	PD	LGD	Risk weight
0.00 to <0.15	$	169,400	$	25,126	0.07	38.42	14.83
0.15 to <0.50		90,929		37,971	0.28	40.65	41.76
0.50 to <1.35		53,973		35,680	0.74	40.25	66.11
1.35 to <10.00		18,603		23,466	4.04	40.63	126.14
10.00 to <100		2,690		5,279	17.16	36.79	196.24
100 (default)		435		459	100.00	N/A [(a)]	105.51
Total	$	336,030	$	127,981	0.72%	39.41%	38.09%

(a) The LGD rate is reported as N/A for defaulted counterpart credit exposures because the RWA is calculated based on supervisor provided risk weights and does not depend on LGD estimates.

Credit risk mitigation

The risk mitigating benefit of eligible guarantees and credit derivative hedges are reflected in the RWA calculation as permitted by the Basel III capital rules. At March 31, 2025, $6.5 billion of EAD for counterparty credit exposures are covered by eligible guarantees.

SECURITIZATION

Securitizations are transactions in which:

- The credit risk of the underlying exposure is transferred to third parties and has been separated into two or more tranches;
- The performance of the securitization depends upon the performance of the underlying exposures or reference assets; and
- All or substantially all of the underlying exposures or reference assets are financial exposures.

Securitizations are classified as either traditional or synthetic. In a traditional securitization, the originator establishes a special purpose entity ("SPE") and sells assets, either originated or purchased from its balance sheet into the SPE, which then issues securities to investors. In a synthetic securitization, credit risk is transferred to investors through the use of credit derivatives or guarantees without altering the accounting treatment for the assets securitized.

Securitizations include on or off-balance sheet exposures, including credit enhancements that arise from a securitization or re-securitization transaction, or exposures that directly or indirectly references a securitization (e.g. credit derivative). A re-securitization is a securitization transaction in which one or more of the underlying exposures that have been securitized is itself a securitization.

This section includes both covered and non-covered securitizations with the exception of covered modeled correlation trading positions which are included in the Market Risk section.

- ➢ Refer to pages 20-21 of the 4Q24 Pillar 3 Report for additional information on securitization exposures, due diligence, risk management and hierarchy of approaches.
- ➢ Refer to Note 1 & Note 14 on pages 177-180 and 271-279, respectively, of the 2024 Form 10-K for a discussion of the accounting policies related to securitization activities and affiliated entities (i.e., voting interest entities and variable interest entities (including SPEs)).
- ➢ Refer to Note 2 on pages 181-202 of the 2024 Form 10-K for a discussion on the valuation of retained or purchased securitization interests.
- ➢ Refer to Note 12, Loans held-for-sale, on page 243, Note 2, the valuation methodology table on page 181, and Note 14, Loan securitizations on page 271, of the 2024 Form 10-K for a discussion of the valuation of loans that are intended to be securitized and accounted for as securitization exposures.
- ➢ Refer to Note 28, Loan sales- and securitization-related indemnifications on pages 302-307 of the 2024 Form 10-K for a discussion of the accounting policies for recognizing a liability associated with loan sales-and securitization-related indemnifications.

Risk-weighted assets

The following table presents covered and non-covered exposures receiving securitization capital treatment (with the exception of covered modeled correlation trading positions, which are included in the Market Risk section). The amounts include traditional and synthetic securitization exposures with re-securitizations shown separately based on Supervisory Formula Approach ("SFA") and Simplified Supervisory Formula Approach ("SSFA").

	Securitization							
	SFA		SSFA		1250%		Total	
March 31, 2025 (in millions)	Exposure	RWA	Exposure	RWA	Exposure	RWA	Exposure	RWA
Risk weight								
= 0% ≤ 20%	$ 120,921	$ 24,567	$ 136,073	$ 28,215	$ —	$ —	$ 256,994	$ 52,782
> 20% ≤ 50%	7,005	2,277	6,124	1,828	—	—	13,129	4,105
> 50% ≤ 100%	737	518	1,822	1,504	—	—	2,559	2,022
> 100% < 1250%	241	731	760	1,780	—	—	1,001	2,511
= 1250%	17	207	23	293	42	556	82	1,056
Securitization, excluding re-securitization	$ 128,921	$ 28,300	$ 144,802	$ 33,620	$ 42	$ 556	$ 273,765	$ 62,476

	Re-securitization							
	SFA		SSFA		1250%		Total	
March 31, 2025 (in millions)	Exposure	RWA	Exposure	RWA	Exposure	RWA	Exposure	RWA
Risk weight								
= 0% ≤ 20%	$ 39	$ 8	$ 3,337	$ 728	$ —	$ —	$ 3,376	$ 736
> 20% ≤ 50%	—	—	144	43	—	—	144	43
> 50% ≤ 100%	—	—	—	—	—	—	—	—
> 100% < 1250%	—	—	—	—	—	—	—	—
= 1250%	—	—	—	4	—	—	—	4
Re-securitization[(a)]	$ 39	$ 8	$ 3,481	$ 775	$ —	$ —	$ 3,520	$ 783
Total securitization [(b)]	$ 128,960	$ 28,308	$ 148,283	$ 34,395	$ 42	$ 556	$ 277,285	$ 63,259

(a) As of March 31, 2025, there were no re-securitizations to which credit risk mitigation has been applied.
(b) Total securitization RWA includes $3.5 billion of covered securitization positions reported as non-modeled specific risk in the Market Risk section of this report.

Any gain-on-sale in connection with a securitization exposure must be deducted from CET1 capital. The amount deducted as of March 31, 2025 was immaterial.

Exposure by collateral type

The following table presents on- and off-balance sheet covered and non-covered securitization exposures (with the exception of covered modeled correlation trading positions, which are included in the Market Risk section) by type of underlying collateral. These exposures arise from both traditional and synthetic securitization transactions.

March 31, 2025 (in millions)	Exposure			
	On-balance sheet	Off-balance sheet[(a)]	Total	RWA
Collateral type:				
Residential mortgages	$ 34,578	$ 1,426	$ 36,004	$ 8,606
Commercial mortgages	43,738	378	44,116	10,277
Commercial and industrial loans	112,086	26,012	138,098	30,225
Consumer auto loans	16,683	8,528	25,211	6,018
Student loans	9,227	946	10,173	2,269
Municipal bonds	13	5,409	5,422	1,432
Other	13,846	4,415	18,261	4,432
Total securitization exposure	$ 230,171	$ 47,114	$ 277,285	$ 63,259

(a) Includes the counterparty credit risk EAD associated with derivative transactions for which the counterparty credit risk is a securitization exposure.

Assets securitized

The following table presents the total outstanding principal balance of JPMorganChase-sponsored securitizations in which the Firm has retained exposure in either covered positions or non-covered positions. Third-party assets in deals sponsored by JPMorganChase are shown separately. During the three months ended March 31, 2025, losses recognized on securitized assets was zero.

March 31, 2025 (in millions)	Principal amount outstanding			
	JPMorganChase assets held in traditional securitizations[(a)]	Third-party assets held in traditional securitizations[(a)]	JPMorganChase assets in synthetic securitizations	Assets 90 days past due or on nonaccrual status
Collateral type:				
Residential mortgages	$ 61,975	$ 10	$ 4,050	$ 855
Commercial mortgages	48,337	89,938	—	1,679
Commercial and industrial loans	240	—	25,845	—
Consumer auto loans	4,709	—	1,234	15
Student loans	28	—	—	2
Municipal bonds	—	—	—	—
Other	—	—	21,543	—
Total	$ 115,289	$ 89,948	$ 52,672	$ 2,551

(a) Represents assets held in nonconsolidated securitization VIEs.

Securitization activity

The following table presents assets pending securitization (i.e., assets held with the intent to securitize) at March 31, 2025, and the Firm’s securitization activities for the three months ended March 31, 2025, related to assets either held in Firm-sponsored securitization entities that were not consolidated by the Firm or held on the Firm's consolidated balance sheet and synthetically securitized. The carrying value of the loans accounted for at fair value under U.S. GAAP approximated the proceeds upon loan sale as changes in fair value were recorded in noninterest revenue. Accordingly, there were no significant gains or losses associated with traditional securitization activities.

	Carrying value	Original principal amount		
		Traditional securitization		Synthetic securitization
	Assets pending securitization	Assets securitized with retained exposure	Assets securitized without retained exposure	Assets securitized with retained exposure
(in millions)	March 31, 2025	three months ended March 31, 2025

EQUITY RISK NOT SUBJECT TO THE MARKET RISK CAPITAL RULES

Equity investments that are not subject to the market risk capital rules (i.e., non-covered positions) include principal investments, investments in unconsolidated subsidiaries, other equity investments classified within other assets and certain equity investments classified within trading assets that do not meet the definition of a covered position. These investments are held primarily for reasons other than capital gains, including client relationships, strategic initiatives and employee benefits.

➢ Refer to Note 2 on page 84 of the 1Q25 Form 10-Q for additional information.

Principal investments are typically privately-held financial instruments representing ownership interests or other forms of junior capital. In general, principal investments include tax-oriented investments and investments made to enhance or accelerate the Firm's business strategies and exclude those that are consolidated on the Firm's balance sheets. These investments are made by dedicated investing businesses or as part of a broader business strategy. The Firm's principal investments are managed by the LOBs and Corporate and are reflected within their respective financial results. The Firm's investments will continue to evolve based on market circumstances and in line with its strategic initiatives. Asset classes primarily include tax-oriented investments (e.g., alternative energy and affordable housing investments), private equity, various debt and equity instruments and investment funds (including separate accounts).

Investments in separate accounts are primarily held in connection with corporate and bank-owned life insurance.

➢ Refer to Note 8 on pages 230-232 of the 2024 Form 10-K for a discussion of COLI and the related investment strategy and asset allocation.

Accounting and valuation policies for equity investments

➢ Refer to Principal risk, on page 140 of the 2024 Form 10-K for a discussion of investment risk management related to principal investments.

➢ Refer to Note 1 on page 83 of the 1Q25 Form 10-Q and pages 177 of the 2024 Form 10-K for a discussion of the accounting for investments in unconsolidated subsidiaries and other non-trading (i.e., non-covered) equity investments.

➢ Refer to Note 2 on page 84 of the 1Q25 Form 10-Q and pages 181-202 of the 2024 Form 10-K for more information on the Firm's methodologies regarding the valuation of private equity direct investments and fund investments (i.e., mutual/ collective investment funds, private equity funds, hedge funds and real estate funds).

Equity risk-weighted assets

The table below presents the exposure and RWA by risk-weight.

March 31, 2025 (in millions)		
Risk-weight category	Exposure[a]	RWA
0%	$ 7,290 [b]	$ —
20%	1,047	222
100%	42,944	45,521
250%	797	2,111
300%	—	—
400%	—	—
600%	4	25
Full Look-Through Approach	25,201	14,728
Simple Modified Look-Through Approach	504	912
Total	$ 77,787	$ 63,519

(a) Includes off-balance sheet unfunded commitments for equity investments of $6.7 billion.
(b) Consists of Federal Reserve Bank stock.

Carrying value and fair value

The following table presents the carrying value and fair value of non-covered equity investments.

March 31, 2025 (in millions)	Carrying value	Fair value
Publicly traded	$ 25,495	$ 25,517
Non-publicly traded	46,951	53,763
Total	$ 72,446	$ 79,280

Realized gains/(losses)

Cumulative realized gains/(losses) from sales and liquidations during the three months ended March 31, 2025 was $38 million. This includes previously recognized unrealized gains/(losses) that have been reversed and booked as realized gains/(losses).

Unrealized gains/(losses)

Estimated net gains that have not been recognized on the Consolidated balance sheet or through earnings on non-covered equity investments that are accounted for under the cost, measurement alternative and equity method were $6.8 billion, which includes Visa B-2 shares as of March 31, 2025.

Market risk is the risk associated with the effect of changes in market factors such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term.

- For a discussion of the Firm's Market Risk Management organization, various metrics, both statistical and non-statistical, used to assess risk and risk monitoring and control, refer to Market Risk Management on pages 141-149 of the 2024 Form 10-K and the 1Q25 Form 10-Q on pages 65-70.

Measures included in market risk RWA

The following table presents the Firm's market risk-based capital and risk-weighted assets at March 31, 2025. The components of market risk RWA are discussed in detail in the Regulatory market risk capital models section on pages 21-24 of this report. RWA is calculated as risk-based capital ("RBC") multiplied by 12.5; any calculation differences are due to rounding.

Three months ended March 31, 2025 (in millions)	Risk-based capital	RWA
Internal models:		
Value-at-Risk based measure ("VBM")	$ 714	$ 8,928
Stressed Value-at-Risk based measure ("SVBM")	1,147	14,342
Incremental risk charge ("IRC")	1,078	13,477
Comprehensive risk measure ("CRM")	212	2,653
Total internal models	3,151	39,400
Non-modeled specific risk	4,643	58,037
Other charges	203	2,527
Total market risk	$ 7,997	$ 99,964

Material portfolio of covered positions

The Firm's portfolio of covered positions under the Basel III capital rules arise predominantly from activities in CIB, which makes markets in products across fixed income, foreign exchange, equities, commodities and credit markets.

- Refer to pages 17-18 and 22-26 of the 1Q25 Form 10-Q for a discussion of CIB's Business Segment Results.

Value-at-Risk ("VaR")

VaR is a statistical risk measure used to estimate the potential loss from adverse market moves in the current market environment.

- Refer to pages 141-149 of the 2024 Form 10-K Market Risk Management for information on the Firm's VaR framework.

The Firm has a single VaR framework used as a basis for calculating Risk Management VaR and Regulatory VaR.

Comparison of Risk Management VaR and Regulatory VaR

Risk Management VaR is calculated assuming a one-day holding period and an expected tail-loss methodology which approximates a 95% confidence level. The Firm believes this provides a daily measure of risk that is closely aligned to risk management decisions made by the LOBs and Corporate and, along with other market risk measures, provides the appropriate information needed to respond to risk events. The Firm's Risk Management VaR is disclosed in its SEC filings.

The Firm calculates Regulatory VaR assuming a 10-business day holding period and an expected tail loss methodology, which approximates a 99% confidence level.

As noted above, Regulatory VaR is applied to "covered" positions as defined by Basel III capital rules, which may be different than the positions included in the Firm's Risk Management VaR. For example, credit derivative hedges of accrual loans are included in the Firm's Risk Management VaR, while Regulatory VaR excludes these credit derivative hedges.

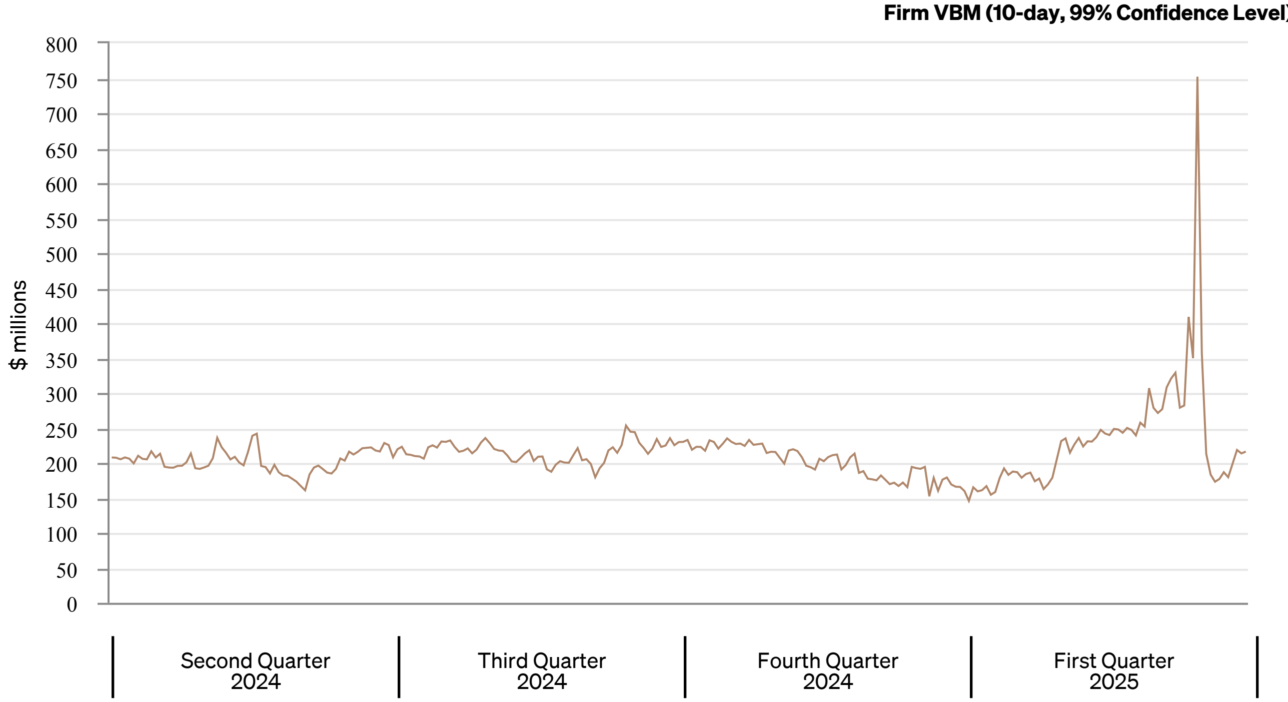
Regulatory market risk capital models

VaR-Based Measure ("VBM")

The VBM is an aggregate loss measure that combines Regulatory VaR and modeled specific risk ("SR") assuming a 10-business day holding period and a 99% confidence level. While Regulatory VaR measures the risk of loss from broad market movements, modeled SR captures risk factors such as event risk, idiosyncratic risk and default risk for a subset of covered positions for which the model is approved by the Firm's banking supervisors.

The following chart presents VBM, assuming a 10-business day holding period, for the 12 months ending March 31, 2025.

Daily VaR-Based Measure Results



CIB VaR-Based Measure ("VBM")

For the three months ended March 31, 2025, average CIB VBM was $230 million.

The adjacent table presents the average, minimum, maximum and period-end VBM by risk type for CIB and the Firm. In addition, the table presents the reduction of total VBM resulting from diversification of the portfolio, which is the total CIB VBM less the sum of the CIB VBM for each risk type.

	Three months ended March 31, 2025[a]			
(in millions)	Avg	Min	Max	March 31, 2025
CIB 10-day VBM by risk type				
Interest rate	$102	$ 81	$ 159	$ 96
Credit spread	92	70	128	105
Foreign exchange	47	31	60	48
Equities	161	77	794	101
Commodities and others	216	75	292	261
Diversification benefit	(388) [b]	NM [c]	NM [c]	(403) [b]
CIB 10-day VBM	230	141	756	208
Firm 10-day VBM	$238	$155	$ 752	$ 216

(a) The average, minimum and maximum measures are based on the 60 business days ending with the quarter-end reporting date.

(b) Average portfolio VBM and period-end portfolio VBM were less than the sum of the components described above due to portfolio diversification.

(c) Designated as not meaningful ("NM"), because the minimum and maximum may occur on different days for different risk components, and hence it is not meaningful to compute a portfolio-diversification effect.

VBM Backtesting

As required by Basel III capital rules, the Firm compares the daily gains and losses with the daily VBM results on covered positions, which for the purpose of backtesting is computed using a 1-day holding period and a 99% confidence level.

The gains and losses differ from the Firm's reported revenue as they exclude certain components of total net revenue, such as those associated with the execution of new transactions (i.e., intraday client-driven trading and intraday risk management activities), fees, commissions, other valuation adjustments and net interest income. These excluded components of total net revenue may more than offset the backtesting gain or loss on a particular day.

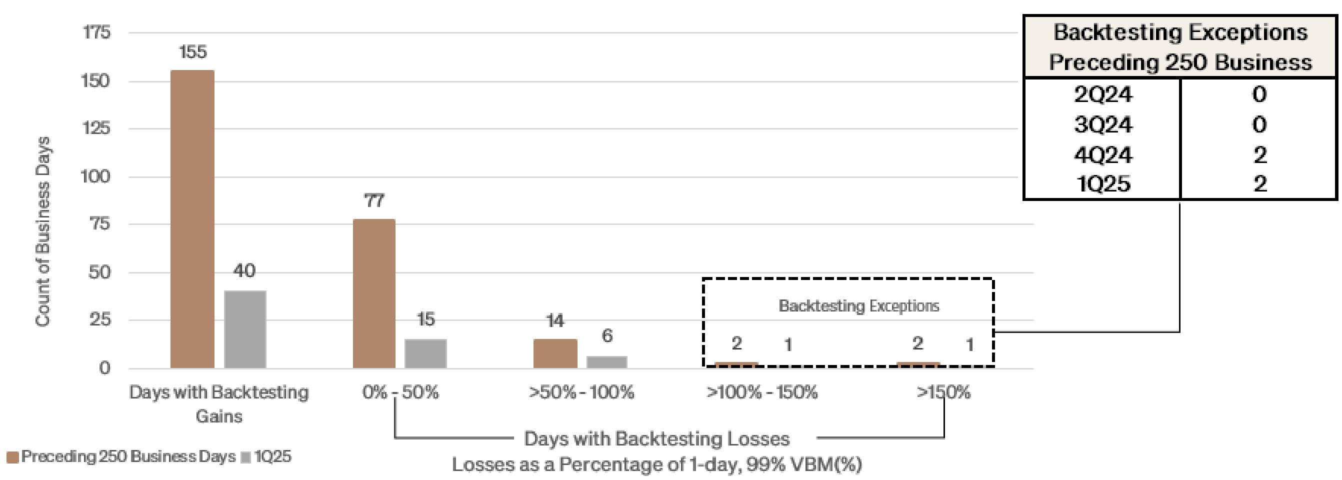
A backtesting exception occurs when the daily backtesting loss exceeds the daily VaR-based measure for the prior day.

Under the Firm's Regulatory VaR methodology, assuming current changes in market values are consistent with the historical changes used in the simulation, the Firm would expect to observe one backtesting exception every 100 business days on average.

The number of backtesting exceptions observed can differ from the statistically expected number of backtesting exceptions if the current level of market volatility is materially different from the level of market volatility during the 12 months of historical data used in the VaR calculation.

The chart below presents the distribution of Firmwide daily backtesting gains and losses for the preceding 250 business days and three months ended March 31, 2025.The daily backtesting losses are displayed as a percentage of the corresponding daily VaR-based measure assuming a 1-day holding period. The count of days with backtesting losses are shown in aggregate, in fifty percentage point intervals. Backtesting exceptions are displayed within the intervals that are greater than one hundred percent. The backtesting results for Regulatory VaR differ from those disclosed in the Market Risk section of the Firm's Form 10-K, which are based on the Firm's Risk Management VaR, and the gains and losses corresponding to that population scope. As shown below, two backtesting exceptions were observed in the three months ended March 31, 2025.

Distribution of Daily Backtesting Gains and Losses



VaR-Based Measure Capital

The following table presents the Firm's VBM capital requirement, which is calculated as the higher of (1) the preceding 60 business days average measure scaled by the Firm's regulatory multiplier and (2) the quarter-end spot measure. The regulatory multiplier is prescribed by the Basel III capital rules based on the number of backtesting exceptions in the preceding 250 business days. As of March 31, 2025, the Firm's regulatory multiplier was 3.00.

Three months ended March 31, 2025 (in millions)	Risk-based capital	RWA
Firm VBM	$ 714	$ 8,928

Stressed VaR-Based Measure ("SVBM")

The SVBM is an aggregate loss measure based on Regulatory VaR and SR models whose inputs are calibrated using historical data from a continuous 12-month period that reflects a period of significant financial stress relevant to the Firm's current portfolio. SVBM is calculated assuming a 10-business day holding period and a 99% confidence level. It is calculated at least weekly, with each measure no less than the corresponding VBM.

The following table presents the average, minimum, maximum and the quarter-end spot measure for 1Q25 for CIB and the Firm.

	Three months ended March 31, 2025 [(a)]			
(in millions)	Avg.	Min	Max	March 31, 2025
CIB 10-day SVBM	$ 377	$ 316	$ 552	$ 361
Firm 10-day SVBM	$ 382	$ 316	$ 551	$ 368

(a) The average, minimum and maximum measures are based on the 12 weeks ending with the quarter-end reporting date.

The following table presents the Firm's SVBM capital requirement, which is calculated as the higher of (1) the preceding 12-weeks average measure scaled by the Firm's regulatory multiplier and (2) the quarter-end spot measure. The regulatory multiplier is prescribed by the Basel III capital rules based on the number of backtesting exceptions in the preceding 250 business days. As of March 31, 2025, the Firm's regulatory multiplier was 3.00.

Three months ended March 31, 2025 (in millions)	Risk-based capital	RWA
Firm SVBM	1,147	$ 14,342

Incremental Risk Charge ("IRC")

The IRC measure captures the risks of issuer default and credit migration that are incremental to the risks already captured in the VBM. The model is intended to measure the potential loss over a one-year holding period at a 99.9% confidence level and is applicable to debt positions that are not correlation trading or securitization positions. The output of the IRC model is used directly as the capital measure and is calculated at least weekly.

➢ For more information on the Firm's IRC model, refer to Market Risk on page 30 of the 4Q24 Pillar 3 Report.

The following table presents the average, minimum, maximum and period-end IRC for the CIB.

	Three months ended March 31, 2025 [(a)]			
(in millions)	Avg.	Min	Max	March 31, 2025
CIB IRC	$ 1,026	$ 609	$ 1,675	$ 1,078

(a) The average, minimum and maximum measures are based on the 12 weeks ending with the quarter-end reporting date.

The following table presents the reported IRC risk-based capital requirement, which under the Basel III capital rules, is calculated as the higher of (1) the quarterly average and (2) the quarter-end spot value.

Three months ended March 31, 2025 (in millions)	Risk-based capital	RWA
CIB IRC	$ 1,078	$ 13,477

Comprehensive Risk Measure ("CRM")

The CRM captures the material price risks of portfolios of correlation trading positions. Correlation trading positions refer to client-driven, market-making activities in credit index and bespoke tranche swaps that are hedged with single-name and index credit default swap positions.

Similar to the IRC, the CRM model measures potential losses over a one-year holding period at a 99.9% confidence level. The CRM is calculated at least weekly.

The CRM risk-based capital requirement for each calculation date is the greater of the modeled CRM and a floor that is equal to 8% of the total specific risk add-on using the standardized approach.

➢ For information on the Firm's CRM Model, refer to Market Risk on pages 31 of the 4Q24 Pillar 3 Report.

The following table presents the average, minimum, maximum and period-end CRM for the CIB.

	Three months ended March 31, 2025 [(a)]			
(in millions)	Avg.	Min	Max	March 31, 2025
CIB CRM	$ 192	$ 164	$ 230	$ 212

(a) The average, minimum and maximum measures are based on the 12 weeks ending with the quarter-end reporting date.

The following table presents the reported CRM risk-based capital requirement, which under Basel III capital rules, is calculated as the higher of (1) the quarterly average and (2) the quarter-end spot value.

Three months ended March 31, 2025 (in millions)	Risk-based capital	RWA
CIB CRM	$ 212	$ 2,653

Aggregate securitization positions

- For information on the aggregate amount of on-balance sheet and off-balance sheet securitization positions with the exception of modelled correlation trading positions, which are included in this section by exposure type, refer to Securitization on page 16 of this report.

Aggregate correlation trading positions

The following table presents the fair value of the Firm's aggregate correlation trading positions and the associated credit hedges. Credit hedges of the correlation trading positions are included as they are considered to be part of the aggregate correlation trading positions.

March 31, 2025 (in millions)	Fair value[(a)]
Positions modeled in CRM	$ (1,851)
Positions not modeled in CRM	(15)
Firm correlation trading positions	$ (1,866)

(a) Reflects the fair value of securities and derivatives, including credit hedges.

Non-modeled specific risk

Non-modeled specific risk is calculated using supervisory-prescribed risk weights and methodologies for covered debt, equity and securitization positions that are not included in modeled SR. The market risk-based capital and risk-weighted assets for non-modeled specific risk are shown in the table below.

March 31, 2025 (in millions)	Risk-based capital	RWA
Securitization positions[(a)]	$ 280	$ 3,500
Non-securitization positions	4,363	54,537
Firm non-modeled specific risk	$ 4,643	$ 58,037

(a) Represents securitization RWA for covered positions only.

Other charges

Other charges reflect exposures receiving alternative capital treatments.

March 31, 2025 (in millions)	Risk-based capital	RWA
Firm other charges	$ 203	$ 2,527

Independent review of market risk regulatory capital models

- For information on independent review of the market risk regulatory capital models, refer to Market Risk on page 32 of the 4Q24 Pillar 3 Report and to Estimations and Model Risk Management on page 160 of the 2024 Form 10-K.

Stress testing

Along with VaR, stress testing is an important tool used to assess risk. While VaR reflects the risk of loss due to adverse changes in markets using recent historical market behavior, stress testing reflects the risk of loss from hypothetical changes in the value of market risk sensitive positions applied simultaneously. Stress testing measures the Firm's vulnerability to losses under a range of stressed but possible economic and market scenarios. The results are used to understand the exposures responsible for those potential losses and are measured against limits.

- For information on the stress testing scenarios and framework, refer to Stress testing on page 146 of the 2024 Form 10-K.

INTEREST RATE RISK FOR TRADITIONAL BANKING ACTIVITIES

Structural interest rate risk management

The effect of interest rate exposure on the Firm's reported net income is important as interest rate risk represents one of the Firm's significant market risks. Interest rate risk arises not only from trading activities which are included in VaR, but also from the Firm's traditional banking activities, which include extension of loans and credit facilities, taking deposits, issuing debt, as well as the investment securities portfolio, and associated derivative instruments.

- Refer to pages 68-70 of the 1Q25 Form 10-Q and pages 147-148 of the 2024 Form 10-K for a detailed discussion of Earnings-at-risk and Economic Value Sensitivity.
- Refer to the table on page 142 of the 2024 Form 10-K for a summary of positions included in earnings-at-risk.

OPERATIONAL RISK MANAGEMENT

Operational risk is the risk of an adverse outcome resulting from inadequate or failed internal processes or systems; human factors; or external events impacting the Firm's processes or systems. Operational Risk includes compliance, conduct, legal, and estimations and model risk. Operational risk is inherent in the Firm's activities and can manifest itself in various ways, including fraudulent acts, business disruptions (including those caused by extraordinary events beyond the Firm's control), cyber attacks, inappropriate employee behavior, failure to comply with applicable laws, rules and regulations or failure of vendors or other third party providers to perform in accordance with their agreements. Operational Risk Management attempts to manage operational risk at appropriate levels in light of the Firm's financial position, the characteristics of its businesses, and the markets and regulatory environments in which it operates.

- Refer to pages 153-160 of the 2024 Form 10-K for a discussion of Operational Risk Management and page 36 of Capital Risk Management of the 1Q25 Form 10-Q for operational risk RWA.
- Refer to Operational Risk Management on pages 153-160 of the 2024 Form 10-K for information related to operational risk measurement.
- Refer to Capital Risk Management on pages 97-107 of the 2024 Form 10-K and page 36 of the 1Q25 Form 10-Q for information related to operational risk RWA.
- Refer to Operational Risk Management on pages 153-160 of the 2024 Form 10-K for information related to other operational risks that can lead to losses which are captured through the Firm's operational risk measurement processes.

SUPPLEMENTARY LEVERAGE RATIO

The SLR is defined as Tier 1 capital under the Basel III capital rules divided by the Firm's total leverage exposure. The tables below present the components of the Firm's SLR as of March 31, 2025 with on-balance sheet amounts calculated as the quarterly average and off-balance sheet amounts calculated as the average of each of the three month's period-end balances.

Summary comparison of accounting assets and total leverage exposure

March 31, 2025 (in millions, except ratios)	Basel III Advanced
Basel III Advanced Tier 1 capital	**$ 299,132**
Total spot assets	4,357,856
Add: Adjustments for frequency of calculations[a]	(122,542)
Total average assets	**4,235,314**
Less adjustments for:	
Adjustments for deductions from Tier 1 capital[b]	55,167
Add adjustments for:	
Adjustment for derivative transactions	301,735
Adjustment for repo-style transactions	53,612
Adjustment for off-balance sheet exposures[c]	417,986
Other	—
Total leverage exposure	**$ 4,953,480**
Basel III Advanced SLR	**6.0 %**

(a) The adjustment for frequency of calculations represents the difference between total spot assets at March 31, 2025, and average assets for the three months ended March 31, 2025.
(b) For purposes of calculating the SLR, includes quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill, inclusive of estimated equity method goodwill, other intangible assets. .
(c) Off-balance sheet exposures are calculated as the average of the three month-end spot balances on applicable regulatory exposures during the reporting quarter.

Derivative transactions

The following table presents the components of total derivative exposure.

(in millions)	March 31, 2025
Replacement cost for all derivative transactions	$ 119,682
Add-on amounts for potential future exposure ("PFE") for all derivative transactions	217,962
Gross-up for collateral posted in derivative transactions if collateral is deducted from on-balance sheet assets	125,548
Less: Deduction of receivable assets for qualifying cash variation margin posted in derivative transactions	125,548
Less: Exempted exposures to central counterparties ("CCPs") in cleared transactions	26,097
Adjusted effective notional principal amount of sold credit protection	627,858
Less: Effective notional principal amount offsets and PFE deductions for sold credit protection	556,888
Total derivative exposure[a]	**382,517**
Less: On-balance-sheet average derivative receivables	80,782
Adjustment for derivative transactions	**$ 301,735**

(a) Receivables for cash variation margin that are posted under a qualifying derivative contract where the Firm has obtained an appropriate legal opinion with respect to master netting agreements with the same counterparty, and where other relevant criteria under U.S. GAAP are met, are netted against derivative liabilities and are not included in on-balance sheet assets.

Repo-style transactions

The following table presents the components of total exposures for repo-style transactions.

(in millions)		March 31, 2025
Gross assets for repo-style transactions[a]	$	936,474
Less: amounts netted[b]		318,202
Add: Counterparty credit risk for all repo-style transactions		55,147
Exposure amount for repo-style transactions where the Firm acts as an agent[c]		157
Total exposures for repo-style exposures		**673,576**
Less: on-balance sheet amounts		
Securities purchased under resale agreements		378,961
Securities borrowed		241,003
Adjustment for repo-style transactions	**$**	**53,612**

(a) Excludes the value of securities received as collateral where the Firm as securities lender has not sold or re-hypothecated the collateral securities received.
(b) Reflects netting of transactions where the Firm has obtained an appropriate legal opinion with respect to master netting agreements with the same counterparty, and where other relevant criteria under U.S. GAAP are met.
(c) Includes exposures where the Firm's guarantee is greater than the difference between the fair value of the security or cash the Firm's customer has lent and the value of the collateral provided.

Other off-balance sheet exposures

The following table presents wholesale and retail commitments after applying the relevant credit conversion factors.

(in millions)		March 31, 2025
Off-balance sheet exposures - gross notional amounts	$	1,682,797
Less: Adjustments for conversion to credit equivalent amounts		1,264,811
Adjustment for other off-balance sheet exposures	**$**	**417,986**

Valuation process

For a discussion of the Firm's valuation methodologies for assets, liabilities and lending-related commitments measured at fair value and the fair value hierarchy, refer to Valuation Process on pages 181-202 in the Note 2 of the 2024 Form 10-K.

- Refer to Note 2 on page 84 of the 1Q25 Form 10-Q, for information on credit and funding valuation adjustments.

References to JPMorganChase's 2024 Form 10-K and 1Q25 Form 10-Q

JPMorganChase's the 1Q25 Form 10-Q contains important information on the Firm's risk management policies and practices, capital management processes, and accounting policies relevant to this report. Specific references are listed below.

Management's discussion and analysis

Notes to consolidated financial
